

Cave, Cape and World Stone: Kin Across Five Centuries

On Okinawa's east coast, a monk's limestone cave, a coral-reef bay and a stone carved with an emigrant's vow explain a town shaped by leaving and returning: centuries as a Ryukyuan district, the age of emigration to Hawaii and the Philippines, a wartime prisoner camp, and the Marine Corps base that today covers much of Kin.

金武町（沖縄県）

In this dossier

1. A history of the district (6 chapters, about 1900 words)
2. Timeline
3. Walking notes
4. Then and now: aerial photographs
5. How the ground was made
6. Disasters remembered
7. Sources (16) and further reading

Written in English from Japanese library sources — chiefly books digitised by the National Diet Library — and official records. Superscript numbers point to the numbered sources at the end, with page frames for the digitised books.

A cape, a bay and a cave

Kin sits on the narrow waist of central Okinawa, where a stubby peninsula and its fringing reef enclose Kin Bay on the island's Pacific side. A Japanese Admiralty gazetteer of 1908 charts the bay as a broad, open anchorage exposed to the east and south, its mouth spanned by reef ground reaching about two miles between Kin Cape and the islets of Tsuken and Kudaka; a county gazetteer published in Naha eleven years later borrows the same survey when it describes the cape's reef running two-thirds of a mile out to sea. That 1919 book, written for Kunigami County by the schoolteacher and local historian Shimabukuro Genichiro, also names the peaks behind the town, Kin-dake and Igei-dake, and lists the harbours strung along the coast that Kin village then administered: Ginoza, Kanna and Fukuhana ports to the north, as well as Kin's own anchorage at Tomikura.¹²

The 1908 Admiralty survey is worth pausing on for another reason: it romanizes the bay as "Chimu Wan" and the cape as "Chimu Saki", the old reading of the place name 金武 used by surveyors and, later, by the wartime US forces who built an airstrip on the peninsula and knew it as Chimu Airfield. The same 1919 gazetteer records that in 1674, in the Ryukyu Kingdom's own administrative reshuffling, land was cut from Nago and from Kin to found the new district of Kushi — evidence that Kin already existed as an established magiri, or district, more than three and a half centuries ago, its bounds at that time reaching inland to take in the hamlets that would only in the twentieth century become the separate village of Ginoza.¹

Local tradition places another arrival on this coast two centuries earlier still. A wandering monk named Nisshu, born in Kii province around 1503, is said to have set out on a votive sea voyage toward the Asian mainland, been driven off course, and washed up at Kin's small port of Fuka in 1522. Finding a deep limestone cave open to the shore, he is said to have taken it for a dwelling of the bodhisattva Kannon, carved three images for it with his own hands, and founded the temple that still stands over the cave mouth as Kimpuzan Kin Kannon-ji. Nisshu went on, by the same tradition, to restore Naminoue Shrine and Gokoku-ji in Naha before ending his life in Satsuma; the 1919 county gazetteer already lists his grave, the temple and the port of Fuka among Kin village's "notable places and historic remains", confirming that the story was well established locally within four centuries of the event it describes.¹¹⁵

The village that sent its sons to Hawaii

Kin's modern fame rests on a single, closely dated episode. Toyama Kyuzo, a Kin-born teacher and prefectural assemblyman, spent the 1890s lobbying Okinawa's government to let islanders emigrate for work, against officials who feared the loss of labour and remittances of face. Failing to move them, he organized the passage privately: a party left Naha and sailed from Yokohama on the steamer China, and on 8 January 1900 twenty-six contract labourers walked onto the Honolulu docks to begin work on Oahu's sugar plantations. Okinawa's prefectural archives, which hold Toyama's papers, record that ten of the twenty-six were young men from Kin itself — the beachhead of what Okinawans still call "the father of overseas emigration" opening, from his own village, a migration that the archives' own accounting puts at about 3,225 people sent abroad from Kin by the time wartime conditions closed the emigration offices in 1941.⁶⁷

Toyama did not stop at Hawaii. A letter he wrote in September 1907 to a former comrade from Okinawa's freedom-and-rights movement, Taira Shinsuke, by then settled in North America, claims credit for having already sent close to five thousand Okinawans abroad — some four thousand to Hawaii and the rest to Mexico, Peru, New Caledonia, the Philippines and Canada — and describes the whole prefecture as "day and night absorbed in plans for going overseas". He had by then founded an emigrants' protective association and an emigrants' newspaper to shield migrants from predatory brokers. A guidebook to Ryukyu published in 1926, sixteen years after Toyama's death, still measured his legacy in the household economics of his own village: villagers of Kin, it reports, had by mutual agreement capped their evening drinking to five go of awamori a month — and were keeping to it — so that the savings could go toward the next passage abroad.³⁸

The same 1926 book locates Toyama's memorial in the landscape rather than in a museum case: his defiant call to leave, it says, was cut into a stone that still stands on a low hill in Kin, a stone that villagers had already taken to calling simply the

"World Stone". A matching verse stone, tourism authorities in Kin note today, was later placed at the Hawaii Okinawa Center to mark the centenary of the 1900 crossing.³⁹

Across the Pacific to Davao

Hawaii is the destination Kin is remembered for, but two directories of overseas Okinawans compiled in the late 1930s show a second, less celebrated stream running to the Philippines. Abaca — Manila hemp, the fibre crop that supplied the world's rope — drew thousands of Okinawan labourers to plantations around Davao on Mindanao from the 1900s, many of them recruited through the Japanese firm Ota Kogyo. A 1937 directory of Japanese abroad and a 1938 gazetteer of prominent Okinawans between them name a run of Kin men who made that crossing: Igei Man'ei, born in Kin in 1892, who landed at Davao in 1912 and went to work for Ota Kogyo; Tsukayama Choso, from Kin's Kanna hamlet, who reached the Davao anchorage of Talomo in August 1918 to grow abaca and later headed a branch of the local Japanese association; and Shimabukuro Chujiro, from Kin's Kochiya hamlet, who landed at Davao in 1919, worked the Royan plantation for two years, then joined Ota Kogyo's Santiago branch.⁴⁵

The same volumes credit a Kin-born planter, Oshiro Kozo, born in 1881, with a reputation among Japanese settlers as a benefactor of Philippine colonization and the head of a colonization company at Bago, near Davao, while a Kin man named Takaesu Izo, a graduate of the prefecture's First Middle School, is recorded heading a fishery cooperative among the Davao settlers. Other entries follow local men into commerce in Manila and into the Japanese army: none of it as famous as the Hawaii crossing, but together the entries show that by the interwar years Kin's emigrants, and the money and letters they sent home, reached well beyond the plantations of Oahu. Some of the men named in these directories came from hamlets — Kanna, Kochiya, and the village of Ginoza itself — that were still legally part of Kin at the time, and would separate to form Ginoza village only in April 1946.⁴⁵¹²

Invasion, occupation and a village split in two

Okinawa's prefectural archives date the war's approach to Kin precisely: reconnaissance and target photography through the winter of 1944–45, a squadron of Japanese suicide boats based at Kin and the neighbouring hamlet of Yaka from January 1945, the American landing on the island's central-west coast on 1 April 1945, and the occupation of Kin village itself four days later, on 5 April. Within the year a detention camp had gone up at Yaka to hold captured Japanese and Okinawan servicemen along with civilians and Koreans caught up in the fighting; the site remains commemorated in the town, and Kin still holds an annual Yaka-bushi singing contest each August in honour of a folk song that local sources trace to that camp.⁶¹³

Remarkably, one substantial prewar building came through the battle standing: the main hall of Kin Kannon-ji, rebuilt in 1942 after an earlier fire, is described by local heritage writers as the only such wooden building on Okinawa's main island to have escaped the fires of 1945, a survival American officers on the post-war garrison are said to have recognized when the temple was later given protected status. The cave beneath it, Nisshu-do, was itself registered as a national Monument by Japan's Agency for Cultural Affairs on 17 February 2026, cited for its roughly thirteen-metre-high inner chamber reached from within the temple grounds.¹⁴¹⁶

Occupation reorganized Kin's map as well as its economy. On 1 April 1946 the northern hamlets of the old Kin village — Kochiya (renamed Matsuda), Ginoza, Sokei and Kanna among them — were split off under the US military government to form the new village of Ginoza, whose own official history still describes the pre-1946 area as "Kin village", the same administrative unit the 1919 gazetteer and the 1930s emigrant directories describe. What remained was a smaller Kin, its old airfield on the peninsula soon repurposed: the prefectural archives record it in use as a firing range from 1947 and record fresh petitions over replacement land following a Marine Corps build-up in 1957, part of the process that made the base at Kin, later named Camp Hansen, into the fixture that still dominates the town.⁶¹²

Reversion and the base-town economy

Okinawa, including Kin, remained under US administration for twenty-seven years after the war, returning to Japanese sovereignty only in 1972; Kin itself gained formal town status, and its present name of Kin-cho, in 1980. Camp Hansen never went away in the meantime, and an exhibition drawn from the prefectural archives in 2019 put the share of Kin's total area occupied by US military facilities at roughly fifty-six percent — context for a townscape in which the base's perimeter fence is often only a street away from ordinary houses and shops.⁶¹⁰

That proximity produced its own culture. Just outside one of Camp Hansen's gates, the district known as Shinkaichi grew up from the 1950s as an entertainment strip serving the base, its bars, tailors and restaurants at their busiest during the Vietnam War years. It was here, at a small diner called Parlor Senri, that the proprietor Gibo Senri is credited by the town's own tourism authority with inventing taco rice around 1984: Mexican taco fillings spooned over plain rice instead of a tortilla, devised as a filling, inexpensive meal for young American servicemen. The dish spread across Okinawa through the 1990s and is now sold as far away as convenience stores and school lunches, but Kin still calls itself its birthplace.¹¹

Reading the ground today

Little of Kin's pre-war built fabric survived 1945, which makes the handful of true survivals worth seeking out deliberately: the 1942 hall over Nisshu's cave; and the 1935 Toyama Memorial Hall, a rare pre-war reinforced-concrete building designed by the Okinawan architect Oshiro Ryutaro and paid for, fittingly, from money left over after the town raised Toyama's statue. Used afterwards as a kindergarten, a town office and an education-board building, the hall was restored to its original appearance and reopened in October 2016, and in February 2021 it became Kin's first nationally Registered Tangible Cultural Property.⁹

Behind the built history, the land itself still shows what the sources describe: the mangrove-lined estuary of the Okukubi River northeast of the old village centre, cited today for supporting all four mangrove species found on the main island, sits exactly where the 1919 gazetteer placed Kin's spring-fed lowland, and the wells and taro paddies still worked in the valley draw on the same limestone groundwater the old sources took for granted. Aerial coverage available for this dossier's companion photo pages begins only in the 1970s, after reversion; the US forces who administered Okinawa before then held their own imagery of the landing beaches and the airfield years earlier; readers wanting to see Kin during the occupation itself will need to look to American, not Japanese, archives.¹

Timeline

mid-1600s	Kin exists as an established Ryukyuan magiri (district), its bounds reaching inland to hamlets that will not separate until 1946. ¹¹²
1522	The monk Nisshu is said to wash ashore at Kin's port of Fuka and found Kin Kannon-ji over a limestone cave. ¹⁵¹⁶
1674	Land is cut from Nago and Kin to found the new district of Kushi, in the kingdom's own administrative reorganisation. ¹
1899-1900	Toyama Kyuzo organizes Okinawa's first group emigration; the party reaches Honolulu on 8 January 1900, twenty-six strong, ten of them from Kin. ⁶⁷
1907	Toyama writes that close to 5,000 Okinawans have emigrated under his arrangements, chiefly to Hawaii. ⁸
1908	Japan's Hydrographic Department surveys Kin Bay and Cape, romanizing the name as "Chimu". ²
1912-1919	Kin villagers land at Davao in the Philippines to grow abaca on plantations run by firms such as Ota Kogyo. ⁴⁵
1935	The Toyama Memorial Hall is completed in Kin, designed by Oshiro Ryutaro. ⁹
1941	Wartime conditions end overseas emigration; the town's own count puts Kin's total emigrants sent since 1899 at about 3,225. ⁶
1 April - 5 April 1945	US forces land on Okinawa's central-west coast and occupy Kin village within days; a detention camp is soon set up at Yaka. ⁶
1 April 1946	Kochiya, Ginoza, Sokei and Kanna separate from Kin village to form Ginoza village under the US military government. ¹²
1947-1965	The former Kin airfield becomes a US forces firing range, then, after a 1957 Marine build-up, the base later named Camp Hansen. ⁶
1972 / 1980	Okinawa reverts to Japanese sovereignty in 1972; Kin gains town status in 1980. ¹⁰
1984	Gibo Senri is credited with inventing taco rice at Parlor Senri in Kin's Shinkaichi entertainment district. ¹¹
2016 / 2021 / 2026	The Toyama Memorial Hall reopens after restoration (2016) and is registered as a cultural property (2021); Kin Kannon-ji's cave is registered as a national Monument (17 February 2026). ⁹¹⁴

Walking notes

Places to stand and look, in walking order. Straight-line distances only; check today's access and opening before you go.

- 1 Kin Kannon-ji and Nisshu-do cave** 金峯山金武観音寺・日秀洞. A 1942 wooden hall, said to be the only one of its kind on Okinawa's main island to have escaped the 1945 battle, stands over a limestone cave whose roughly 13-metre inner chamber was registered a national Monument in February 2026; look for the shrine-and-temple images sharing the same precinct, a survival of pre-Meiji religious practice.¹⁴¹⁶
- 2 Toyama Memorial Hall** 當山記念館. A 1935 reinforced-concrete hall with a curved, beamless ceiling and round windows, designed by Oshiro Ryutaro and funded from the surplus of Toyama Kyuzo's statue fund; restored and reopened in 2016, it now displays material on Kin's emigration history.⁹
- 3 Toyama Kyuzo's statue and the "World Stone"** 當山久三の像・世界石. A statue of the emigration pioneer stands near the memorial hall; a verse stone nearby, which villagers came to call the "World Stone", carries Toyama's own call to leave for the wider world, a companion to a matching stone later placed at the Hawaii Okinawa Center.³⁹

- 4 **Yaka** 屋嘉. The hamlet north of the old village centre where a US detention camp held Japanese and Okinawan servicemen and civilians from 1945; the town's annual Yaka-bushi singing contest each August commemorates a folk song local histories trace to the camp.⁶¹³
- 5 **Shinkaichi and the taco rice diners** 新開地. The strip of bars and restaurants that grew up outside a Camp Hansen gate from the 1950s; a diner here is credited with inventing taco rice around 1984 to feed young servicemen cheaply and quickly.¹¹
- 6 **Okukubi River mangroves** 億首川. An estuary northeast of the town centre where all four mangrove species found on the Okinawan mainland grow; the spring-fed valley behind it still carries the taro paddies and wells that the area's limestone groundwater has supported for generations.¹

The same ground, 1974–1978 and 2023

1974–1978 aerial photograph — GSI Tiles *gazo1*, cropped and annotated by Japan Time Atlas. North is up; the frame is identical in both images.

2023 annual orthophoto — GSI Tiles *nendophoto2023*, cropped and annotated by Japan Time Atlas. Capture dates within a mosaic can differ from place to place.

How to compare. Anchor on features that rarely move — river banks, rail lines, shrine and temple grounds, main roads — then look for what changed around them. Differences in tone come from film, camera and season, not from the land itself.

Rivers, shorelines and terraces

Natural landforms as classified by GSI, over a recent aerial photograph in gray. Dark blue outlines mark former river channels.

Mountain and hill slopes 36%	Plateaus and terraces 27%
Floodplain and coastal plain 4.8%	Hollows and shallow valleys 3.3%
Water 2.0%	

What the main landforms mean

Mountain and hill slopes (36%). Ridges, valleys and fairly steep ground, including terrace-scarp slopes and volcanic ground. Heavy rain or earthquakes can trigger slope failures, debris flows and landslides.

Plateaus and terraces (27%). Flat ground standing in steps above its surroundings, left behind as the land around it was eroded. River flooding is rarely a threat unless the terrace is only slightly above the river; watch the slopes at its edges. Firm ground: shaking is relatively weak and liquefaction is unlikely.

Floodplain and coastal plain (4.8%). Low, flat ground of little relief, built from sand and mud left by floods, or former seabed that emerged. River flooding. Ground is softer nearer the coast and shakes somewhat more; liquefaction tendency is strong on coastal plains and somewhat strong on floodplains. Storm surge near the coast.

Descriptions translated and condensed from GSI's landform-classification legend. They describe tendencies of each landform type, not the condition of any individual plot.

Fill, reclamation and the fields beneath the town

Hatching: man-made ground as classified by GSI. Teal outlines: former sea, river or pond. Dark blue outlines: former river channels.

Man-made ground

-  Cut ground 32%
-  Filled and reclaimed land 7.5%
-  Under construction when mapped 1.7%

Meiji-era lowland

GSI has not traced Meiji-era lowland for this frame.

Cut ground (32%). Ground made by cutting into slopes of mountains or terrace edges. Depending on the cut slope, heavy rain or earthquakes may bring it down; the ground itself is generally firm.

Filled and reclaimed land (7.5%). Ground raised with fill, land made by dumping soil into the sea, rivers or ponds, or valleys filled in. May flood if not raised enough; on hills, rain or earthquakes can make the fill fail; in lowlands the liquefaction tendency is very strong, especially on filled sea, lake or river beds.

Memorials to natural disasters nearby

Numbered memorials; the black rectangle is the study area of this brief. Frame 60 km across.

Fewer than three memorials stand within 3 km of the study area, so the nearest ones within 30 km are listed.

	Memorial	Disaster	Erected	Distance
1	Monument to the 1960 Chile tsunami at Oura 津波襲来の碑	Chile tsunami (24 May 1960) · tsunami	2012	15.9 km
2	Site of the 1960 Chile tsunami disaster at Makiya 津波被災地跡	Chile tsunami (24 May 1960) · tsunami	1995	22.1 km
3	History of Yagaji Bridge, washed away by the 1960 Chile tsunami 屋我地大橋の歴史	Chile tsunami (24 May 1960) · tsunami	unknown	22.8 km

What the memorials record

1. **Monument to the 1960 Chile tsunami at Oura.** In May 1960 a magnitude 8.5 earthquake in Chile set off a great tsunami that crossed the Pacific to the seas around Japan. It struck here several times, reaching up to 5 m, destroying Oura Bridge and breaking the seawall.
2. **Site of the 1960 Chile tsunami disaster at Makiya.** On 23 May 1960 a magnitude 8.5 earthquake off Chile set off a great tsunami that crossed the Pacific. Makiya Elementary School stood here, and all of its buildings were destroyed by the tsunami; 3 people died in the area.
3. **History of Yagaji Bridge, washed away by the 1960 Chile tsunami.** The first Yagaji Bridge, completed in 1953, was washed away only seven years later by the 1960 tsunami from an earthquake in Chile, almost on the opposite side of the globe.

Source: GSI Natural Disaster Memorials (自然災害伝承碑). English names and notes are Japan Time Atlas translations and summaries of GSI's Japanese descriptions; the memorials' own inscriptions may say more. "Erected" is the year GSI records for the monument.

- 金武町誌 (金武町誌編纂委員会編, 1983) — The town's first comprehensive gazetteer, covering the early-modern period through municipal administration; full-text search shows hits on 布哇 (Hawaii) at frames including 149 and 238. <https://dl.ndl.go.jp/pid/9774522> (NDL individual digital transmission (registered users))
- 金武町史 第1巻 移民・本編 (金武町史編さん委員会編, 1996) — The town's dedicated emigration volume, covering Toyama Kyuzo and Kin's emigrants in far more depth than could be verified here; won the 1996 Okinawa Times Publishing Culture Award special prize. <https://ndlsearch.ndl.go.jp/books/R100000136-I1970867909896787850> (NDL individual digital transmission (registered users))
- 金武町史 第2巻 戦争・本編 (金武町史編さん委員会編, 2002) — Wartime testimony from Kin residents, including experiences at the Yaka camp and among overseas emigrants caught up in the war. <https://dl.ndl.go.jp/pid/9640038> (NDL individual digital transmission (registered users))
- 宜野座村誌 第1巻 (通史編) (宜野座村誌編集委員会編, 1991) — Ginoza's own village history, covering in detail the hamlets that separated from Kin in 1946 and their shared pre-war history with it. <https://dl.ndl.go.jp/pid/13253009> (NDL individual digital transmission (registered users))
- 時代の先駆者当山久三：沖縄現代史の一節 (湧川清栄著, 1953) — An early full-length biography of Toyama Kyuzo by a writer who knew the emigration movement at first hand. <https://dl.ndl.go.jp/pid/11441422> (NDL individual digital transmission (registered users))
- 当山久三伝 (湧川清栄著, 1973) — A later, more documented biography of Toyama, useful for verifying the exact wording of his verse on the "World Stone", which this dossier could not confirm from a source read in this session. <https://dl.ndl.go.jp/pid/12285967> (NDL individual digital transmission (registered users))
- 日本移民の地理学的研究：沖縄・広島・山口 (石川友紀著, 1997) — An academic geography of Okinawan, Hiroshima and Yamaguchi emigration with statistical detail on Kin's contribution; NDL premises only. <https://dl.ndl.go.jp/pid/13905031> (NDL premises only)

Where a Deep Research request would go next

- **Toyama Kyuzo's original papers, the exact text of the "World Stone" verse, and photographs of the 1899-1900 departure** — 沖縄県公文書館 (Okinawa Prefectural Archives), Naha, which holds Toyama's correspondence and exhibition materials. Search the Archives' online catalogue for 当山久三 and 金武, or request an appointment to view originals in the reading room.
- **Individual emigration records for Kin villagers (ships, dates, destinations)** — 沖縄県立図書館の沖縄県系移民渡航記録データベース 1900-1941 (Okinawa Prefectural Library's emigrant travel-record database). Search the online database by home village (金武村/金武町) or by surname; the library's reference desk can advise on reading pre-war family registers alongside it.
- **Pre-1974 aerial photographs of Kin, the airfield/Camp Hansen site, and the 1945 landing beaches** — US National Archives (NARA), College Park, Maryland: wartime and occupation-era aerial photography and unit records (e.g. RG 127 US Marine Corps, RG 407 US Army). Search the NARA catalog by place name (Kin, Chimu) and unit; reproductions can be ordered remotely.
- **The full run of 金武町史 (1983, 1996, 2002) and any research since, including the war-testimony and immigration-testimony volumes** — 金武町教育委員会 社会教育課 町史編さん室 (Kin Town Board of Education, Town History Compilation Office) and Okinawa Prefectural Library. Contact the town's Board of Education directly for in-print volumes, or consult the Prefectural Library's local-history room.
- **Labour contracts and company records for Okinawan abaca workers at Davao** — 外交史料館 (Diplomatic Archives of the Ministry of Foreign Affairs), Tokyo, which holds pre-war passport and emigration-company records; Philippine-side archives in Davao/Manila. Request pre-war passport registers (旅券下付表) for Kunigami County by name; for the Philippine side, consult the Ateneo de Davao University's research collections on the pre-war Japanese community.

Caveats

- The exact wording of Toyama Kyuzo's verse on the 'World Stone' is widely reported in tourism and popular sources but was not verified here against a primary text opened in this session, so it is described but not quoted.
- Details of the wartime detention camp at Yaka (numbers held, exact closure date) are reported in secondary sources this dossier could not verify directly; only what the Prefectural Archives' own exhibition and a library reference answer support is stated here.
- The share of Kin's land occupied by US military facilities is given as an official exhibition reported it in 2019 (about 56 percent); current, precise figures were not independently retrieved in this session.

- Camp Hansen's English name and its connection to a named US serviceman could not be confirmed from a source reachable in this session (US Marine Corps and Medal of Honor Society sites returned access errors), and is therefore left out rather than stated on the strength of unverified secondary accounts.

Digitised books are cited, not reproduced: the page frames let you open the same page in the NDL Digital Collections. Aerial photographs, landform and memorial data: GSI, processed by Japan Time Atlas. This experimental edition is a draft for testing the product and has not had independent fact-checking.
